SCAN RESULT

No QR detected yet.

Payment Guide

Follow these steps when paying a merchant.

1. Ask the merchant to generate a fresh payment QR for the item you are buying.
2. Allow camera access so the scanner can read the QR code.
3. Review the merchant name, item, and amount before you continue.
4. Tap Pay Now only when the payment details match the purchase.

Camera scanning works on **localhost** or secure HTTPS pages. If the rear camera is unavailable, try **Switch Camera**.
